

USER'S MANUAL

YP530

Before using the projector, please read the instructions carefully.

Safety Precautions

In order to ensure safe use of the machine, be sure to read it carefully before use.

Warning!

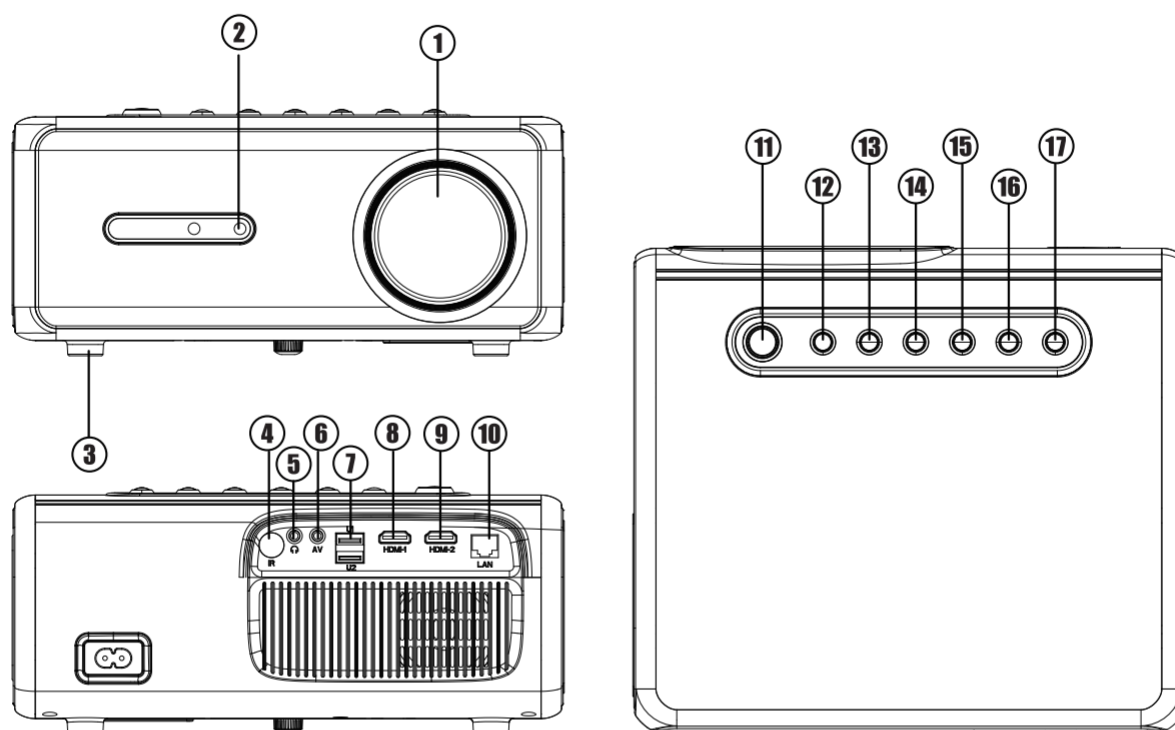

How to use the projector correctly?

1. Do not look directly into the lens when the projector is working, the strong light will hurt the eyes.
2. Do not block the air outlet to avoid damaging the cooling function of the internal electronic equipment.
3. Do not use chemicals, cleaners or water to clean, but also to avoid rain, moisture and colorless liquid corrosion of the circuit board.
4. Keep the projector and accessories out of reach of children.
5. Keep the working environment of the projector dry and ventilated.
6. Do not put the projector in too hot or too cold environment, high or low temperature will shorten the service life of the device. The optimum temperature is 5°C~35°C.
7. Do not use heating equipment for dehumidification including but not limited to dryers and microwave ovens.
8. Do not press or place heavy objects on the projector to prevent damage
9. Do not throw, hit or shake the projector to prevent damage to the internal wiring.
10. Please contact after-sales service if you have any questions. Do not disassemble yourself.
11. Do not repair the projector yourself, if the projector does not work properly, please contact after-sales service repair.
